GMOD 2008

Summer School

Applications

The course is free but enrollment is limited. To apply please submit a Statement of Interest, available from the GMOD web site.

Applications will be reviewed starting on April 15.

The first annual GMOD Summer School is a 2 1/2 day hands-on workshop aimed at teaching new GMOD users how to get up and running with popular GMOD components. There will also be a concurrent 1 day session for principal investigators and decision makers that will give you a feel for what GMOD can do and what level of resources are needed to get a GMOD installation up and running.

Tentative Program

	Time	Implementation Track	PI Track
FRI	9-10	**GMOD Overview** Scott Cain, Dave Clements	Starts on Saturday
	10-12	**Chado: Theory** Dave Clements GMOD's database schema	
	1-3	**Chado: Practice** Scott Cain	
	3-5	**GBrowse I** Scott Cain Generic Genome Browser	
	6:30-9	**GBrowse II** Scott Cain	
SAT	9-12:30	**Apollo** Ed Lee Genome annotation editor	
	1:30-5	**CMap** Ben Faga Comparative map viewer	**GMOD Overview** Scott Cain and Dave Clements
SUN	9-12:30	**Community Annotation Server** Scott Cain Popular GMOD components all in one package.	
	12:30-1	**Wrapup and Resources** Scott Cain and Dave Clements	

GMOD is a set of interoperable open source software tools for visualizing, managing and annotating genomic data. If you need to manage genomic data, consider attending this course.
